PROFILE

Software Developer with a Bachelor's degree in Computer Science and an MBA in Supply Chain Management. Experienced in object-oriented programming, databases, and translating operational requirements into structured software and data solutions. Currently advancing software engineering fundamentals full-time through the project-based curriculum at 42 Heilbronn.

EDUCATION & TRAINING

42 Heilbronn School — Full-time • Developing modular programs in C and C++ with a strong focus on memory management and structured architecture • Building applications to strict coding standards under a peer-review process • Practicing debugging, testing, and performance optimization on every project	May 2025 – Present
Master of Business Administration, Supply Chain Management <i>University of Mysore · Grade A</i> • Key subjects: Operations Strategy and Management, Process and Project Management, Data-Driven Decision Making	Jun 2016 – May 2018
Bachelor of Engineering, Computer Science <i>Anna University · First Class</i> • Key subjects: Object-Oriented Programming, Database Management Systems, Programming in C and C++	Aug 2011 – Jun 2015

PROFESSIONAL EXPERIENCE

Freelance IT & Data Consultant <i>Remote, Germany · Part-time</i> • Applied data science techniques with MySQL, SQL Server, and SQLite for small businesses and personal projects • Delivered actionable insights through Tableau and Looker Studio (formerly Google Data Studio) visualizations • Designed structured data models and optimized queries for reporting and analytics • Gathered requirements directly from stakeholders and converted them into functional software solutions • Conducted debugging, testing, and iterative improvements to ensure reliability and performance	Jan 2021 – Mar 2025
Operations Manager <i>Family Business, India</i> • Analyzed operational workflows and implemented structured process improvements • Designed data-driven tracking systems (Excel and database-based monitoring) to replace ad-hoc reporting • Worked cross-functionally to improve process stability and reporting accuracy • Supported digitalisation and workflow-automation initiatives across the business	Jan 2019 – Dec 2020
Management Trainee <i>Pioneer Developers, Bangalore, India</i> • Facilitated coordination between sales and technical teams to improve customer engagement • Performed data-driven sales analysis in Excel, tracking KPIs and supporting strategic decisions	Jun 2018 – Dec 2018

PROJECTS

Secure ATM Access with Biometrics and OTP <i>BE final-year project</i> • Developed a prototype for secure bank transactions using biometric authentication and card readers • Built the backend database in MySQL with full CRUD functionality • Applied object-oriented programming principles in system design • Conducted structured software testing and user-acceptance testing • Focused on system reliability, validation logic, and error handling	Nov 2014 – Apr 2015
Retail & E-Commerce Assortment Analytics <i>MBA project, Bangalore area</i> • Conducted structured customer surveys and cleaned data for inconsistencies • Provided data-driven recommendations to improve assortment and purchasing decisions • Developed Excel dashboards to identify trends and track business performance	Jan 2018 – May 2018

SKILLS

Programming Languages	C, C++, Python, SQL
Development Tools	Git, VS Code, Visual Studio 2022, JetBrains IDEs
Data & Analytics	MySQL, SQL Server, SQLite, Tableau, Power BI, MS Excel, Looker Studio
Operating Systems	Windows, macOS, Linux (Debian, Ubuntu, CentOS)
Project Management	Agile & Scrum, risk management, project planning & scheduling
Operations & Process	Supply chain management, Six Sigma, workflow automation, performance metrics

LANGUAGES

English Fluent	German telc B1 (2021); B2 self-assessed	Malayalam Native
--------------------------	---	----------------------------

CERTIFICATIONS

StartSteps AI (2022) · Google Data Analytics (2023) · HackerRank — Python · telc Deutsch-Test für Zuwanderer — Result B1 (exam 19.11.2021)

HOBBIES

Hiking, reading, painting, solving puzzles, travelling
