Niederlassungserlaubnis — unrestricted right to work in Germany, no sponsorship required

PROFILE

Software developer in full-time training at 42 Heilbronn (currently level 5), with a Bachelor's degree in Computer Science and an MBA in Supply Chain Management. Four years of self-directed work in Python, SQL and data analysis; before that, hands-on experience running operations in a family business. Seeking a first professional role as a software developer.

EDUCATION & TRAINING

42 Heilbronn School — Full-time May 2025 – Present

- Developing modular programs in C and C++ with a strong focus on memory management and structured architecture
- Building applications to strict coding standards under a peer-review process
- Debugging and testing on every project; currently level 5 of the Common Core
- Completed and defended 9 projects so far, including minishell (a UNIX shell), push_swap and pipex

Self-directed study — data analysis & software development Jan 2021 – Apr 2025

Germany · approx. 30 hrs/week

- Personal projects, not client work: analysed datasets of up to 2 GB in Python with pandas, numpy and matplotlib, designing the SQLite schemas and queries behind them
- Wrote the cleaning and filtering pipelines that were the bulk of the work; with them, rebuilding one of my own dashboards took 2–3 hours instead of 3–5 days
- Built format converters and desktop tools with a tkinter interface; produced dashboards in Tableau and Looker Studio
- Completed the Google Data Analytics certificate (all eight courses) and reached telc B1 in German over the same period
- Retrained toward software engineering, leading to full-time entry at 42 Heilbronn in May 2025

Master of Business Administration, Supply Chain Management Jun 2016 – May 2018

University of Mysore · Grade A

- Key subjects: Operations Strategy and Management, Process and Project Management, Data-Driven Decision Making

Bachelor of Engineering, Computer Science Aug 2011 – Jun 2015

Anna University · First Class

- Key subjects: Object-Oriented Programming, Database Management Systems, Programming in C and C++

WORK EXPERIENCE

Operations Manager Jan 2019 – Dec 2020

Family rubber estate, Kerala, India

- Ran daily operations of a rubber estate employing 25–30 workers, covering tapping crews, latex collection, barrel storage and preservation, sheet processing and sale
- Set up and kept the tracking the operation ran on: worker attendance, per-worker daily yield and daily raw-latex volume, aggregated monthly to drive sales
- Used that data to keep collection on schedule and monitor working hours so no one was overworked
- Managed attendance, daily wage payment and shift timings for the full workforce

Management Trainee Jun 2018 – Dec 2018

Pioneer Developers (real estate), Bangalore, India

- Phone-based pre-sales for a real-estate developer: looked after 8 customer accounts and coordinated between the sales and technical teams
- Tracked sales figures and KPIs in Excel for the sales team

PROJECTS

Secure ATM Access with Biometrics and OTP Nov 2014 – Apr 2015

BE final-year project · team of four

- Developed a prototype for secure bank transactions using biometric authentication and card readers
- Built the backend database in MySQL with full CRUD functionality
- Applied object-oriented programming principles in system design
- Conducted structured software testing and user-acceptance testing
- Focused on system reliability, validation logic, and error handling

Retail & E-Commerce Assortment Analytics Jan 2018 – May 2018

MBA project, Bangalore area

- Conducted structured customer surveys and cleaned data for inconsistencies
- Provided data-driven recommendations to improve assortment and purchasing decisions
- Developed Excel dashboards to identify trends and track business performance

SKILLS

Programming Languages	C, C++, Python, SQL
Development Tools	Git, VS Code, Visual Studio 2022, JetBrains IDEs
Data & Analytics	MySQL, SQL Server, SQLite, Tableau, Looker Studio, MS Excel · *basic: Power BI*
Operating Systems	Windows, macOS, Linux (Debian, Ubuntu, CentOS)
Project Management	Project planning & scheduling · *MBA coursework: Agile & Scrum, risk management*
Operations & Process	Supply chain management, Six Sigma methods, workflow automation, performance metrics

LANGUAGES

English	**German**	**Malayalam**
Native / bilingual	telc B1 (2021); B2 self-assessed	Native

CERTIFICATIONS

Google Data Analytics (2023) · HackerRank Python, Intermediate (2024) · telc Deutsch-Test für Zuwanderer — Result B1 (exam 19.11.2021)

HOBBIES

Hiking, reading, painting, solving puzzles, travelling
