

URSILA PRADEEP VADAKKUMPURAM

MBA Supply Chain Management · Operations & Data Analytics · Software Engineering

[Street, Postal code, City, Germany] | [Phone] | [Email]

[LinkedIn URL] | [Nationality] | [Work authorisation for Germany]

PROFILE

MBA in Supply Chain Management with nearly seven years spanning operations management, freelance data consulting and management training (2018–2025), currently completing full-time software engineering training at 42 Heilbronn. I combine supply chain and operations grounding with hands-on data capability — SQL data modelling, Tableau and Power BI reporting — and a software engineer's discipline in how systems are built and debugged. I am applying to the Bosch Junior Managers Program to develop as a leader in a global supply chain organisation.

EDUCATION

Software Engineering Programme

May 2025 – Present

42 Heilbronn — Heilbronn, Germany

- Full-time, project-based training in modular C programming and manual memory management.
- Peer review as the core assessment method: evaluating and defending code with other students daily.
- Structured debugging and code-quality discipline across independently scoped projects.

Master of Business Administration — Supply Chain Management

Jun 2016 – May 2018

[University name, City, Country] — Final grade: [grade / GPA + scale]

- Operations strategy, project management and data-driven decision-making in complex business environments.
- Master's thesis: [thesis title and grade]

Bachelor of Engineering — Computer Science

Aug 2011 – Jun 2015

[University name, City, Country] — Final grade: [grade / GPA + scale]

- Object-oriented programming, database systems, C/C++ and software design principles.

PROFESSIONAL EXPERIENCE

Freelance IT & Data Consultant

Jan 2021 – Mar 2025

Self-employed — [City, Country]

- Built SQL data models and Tableau dashboards for small-business clients, turning operational and commercial data into reporting they could act on.
- Delivered reporting solutions across [number] clients in [sectors] .
- [One measurable outcome — e.g. reporting cycle reduced from X to Y, or a decision the dashboard changed]

Operations Manager

Jan 2019 – Dec 2020

[Employer, City, Country]

- Improved process stability across operational teams and strengthened operational reporting between them.
- Built data-driven tracking systems to monitor day-to-day operational performance.
- Led [team size] across [scope: sites, volumes, product lines] .
- [One measurable improvement — e.g. % change in on-time delivery, error rate, throughput or cost]

Management Trainee

Jun 2018 – Dec 2018

[Employer, City, Country]

- Coordinated between sales and technical teams, bridging commercial requirements and technical delivery.
- Produced Excel-based analysis to support management decision-making.
- Rotated through [which functions / departments] .

INTERNATIONAL EXPERIENCE

[Country — organisation / university / employer]

[dates]

- [Required by the advert: at least three months abroad. State the country, the organisation, the exact dates and the total duration. Relocating to Germany for 42 Heilbronn qualifies if you moved from another country — if so, name your home country and the relocation date here.]

SELECTED PROJECTS

Retail & E-Commerce Assortment Optimisation

Jan 2018 – May 2018

- Data cleaning and survey analysis feeding dashboard-backed recommendations for assortment optimisation.

Secure ATM Access with Biometrics and OTP

Nov 2014 – Apr 2015

- Prototype for secure banking transactions combining biometric authentication, card-reader integration and a MySQL-backed system.

SKILLS

Data & Analytics	SQL, MySQL, SQL Server, data modelling, Tableau, Power BI, MS Excel
Programming	C, C++, Python
Supply Chain & Operations	Operations strategy, project planning, process improvement, operational reporting
Ways of Working	Agile & Scrum, Git, debugging & testing, VS Code, JetBrains IDEs

CERTIFICATIONS

[year]	Google Data Analytics Professional Certificate
[year]	StartSteps — Artificial Intelligence
[year]	HackerRank — Python
